PART 1: COMPLETE NEGOTIATION SUCCESS (Initial Offer to Final Settlement)
1 POST /api/offers/ (listing_id: 1, amount: 1850.00, message: "Initial offer on Moog synth")
2 SELECT * FROM listings_listing WHERE id = 1
3 Listing Found (status: active, seller_id: 2, price: 2200.00)
Validation: buyer_id (1) != seller_id (2) and listing is active
4 INSERT INTO offers_offer (initial_amount: 1850, current_amount: 1850, status: pending, last_actor: 1)
5 Offer Created (id: 101)
6 INSERT INTO offers_offerhistory (offer_id: 101, actor: 1, action: initial_offer, amount: 1850)
7 Audit Record Persisted
8 HTTP 201 Created (Offer Pending Seller Review)
9 POST /api/offers/101/counter/ (amount: 2000.00, message: "Includes original flight case")
10 SELECT * FROM offers_offer WHERE id = 101
11 Offer Record (status: pending, last_actor: 1)
Turn Check: user (2) != last_actor (1) - Valid counter move!
12 UPDATE offers_offer SET current_amount = 2000, status = countered_by_seller, last_actor = 2
13 Offer Updated
14 INSERT INTO offers_offerhistory (offer_id: 101, actor: 2, action: counter_offer, amount: 2000)
15 Audit Record Persisted
16 HTTP 200 OK (Counter-Offer Dispatched to Buyer)
17 POST /api/offers/101/accept/
18 SELECT * FROM offers_offer WHERE id = 101
19 Offer Record (status: countered_by_seller, last_actor: 2)
BEGIN transaction.atomic()
20 UPDATE offers_offer SET status = accepted WHERE id = 101
21 UPDATE listings_listing SET status = reserved WHERE id = 1
22 INSERT INTO offers_offerhistory (offer_id: 101, actor: 1, action: accepted, amount: 2000)
23 Listing Reserved and Agreement Sealed
COMMIT transaction.atomic()
24 HTTP 200 OK (Offer Accepted - Listing Reserved)
25 POST /api/offers/101/complete/
26 SELECT * FROM offers_offer WHERE id = 101
27 Offer Record (status: accepted)
BEGIN transaction.atomic()
28 UPDATE offers_offer SET status = completed WHERE id = 101
29 UPDATE listings_listing SET status = sold WHERE id = 1
30 INSERT INTO offers_offerhistory (offer_id: 101, actor: 1, action: completed, amount: 2000)
31 Transaction Finalized
COMMIT transaction.atomic()
32 HTTP 200 OK (Transaction Completed - Review Unlocked)
PART 2: VERIFIED REVIEWS AND REPUTATION ENGINE
33 POST /api/reviews/ (offer_id: 101, rating: 5, comment: "Synth in pristine condition!")
34 SELECT * FROM offers_offer WHERE id = 101
35 Offer Record (status: completed, buyer: 1, seller: 2)
Eligibility Check: user is legitimate party and status is completed
36 INSERT INTO reviews_review (offer_id: 101, reviewer: 1, reviewee: 2, rating: 5)
37 Review Persisted
38 SELECT AVG(rating), COUNT(id) FROM reviews_review WHERE reviewee_id = 2
39 rating_avg: 5.00, rating_count: 8
40 UPDATE users_customuser SET rating_avg = 5.00, rating_count = 8 WHERE id = 2
41 Seller Reputation Updated
42 HTTP 201 Created (Verified Review Published)
43 POST /api/reviews/ (Attempt duplicate review on offer_id: 101)
44 INSERT INTO reviews_review (offer_id: 101, reviewer: 1)
45 Database UniqueConstraint(offer_id, reviewer_id) VIOLATION!
46 HTTP 400 Bad Request (Duplicate Review Prohibited)
PART 3: FRAUD PREVENTION AND TURN ENFORCEMENT DEFENSE
47 POST /api/offers/ (Attempt offer on own listing id: 1)
48 HTTP 400 Bad Request (You cannot make an offer on your own listing)
49 POST /api/offers/101/counter/ (Attempt back-to-back counter without seller reply)
50 SELECT last_actor FROM offers_offer WHERE id = 101
51 last_actor = buyer
Violation: User is already last_actor - must await counter-party!
52 HTTP 400 Bad Request (Awaiting response from counter-party)
53 POST /api/offers/101/counter/ (Attempt counter on completed offer)
54 HTTP 400 Bad Request (Cannot counter an offer that is already completed)
